

AN IMPORTANT MESSAGE FROM CARENET MEDICAL GROUP

By now, you are all aware of rising health concerns surrounding COVID-19 (coronavirus). Below are some important updates to keep in mind in the upcoming weeks.

1. Please do not come to the office if you have flu-like symptoms, such as coughing, sneezing, runny nose, body aches, or fever. If you are having these symptoms you should contact your public health office/primary care office for further information and instruction. Please also do not come to the office if you had a known exposure to someone who tested positive for the Coronavirus.
2. This is a developing situation and there is still much unknown about the virus. As of now, we do not know the effects of the virus on pregnancy, or a fetus, but would consider a pregnant patient a high-risk individual when following coronavirus guidelines being recommended by the CDC
3. Precautions should be taken to wash hands frequently and avoid touching your face. A mask does not protect you from getting infected by others, but may be useful if you have a cough to prevent you from spreading infection to others.

The health and safety of our patients and staff at CareNet Medical Group are extremely important to us. We appreciate your patience and understanding as we continue to monitor the evolving situation concerning COVID-19.

For the most up-to-date information go to: www.CDC.gov/coronavirus

Sincerely,

CareNet Medical Group
